

Mag Data Spa, founded in Colorno (Parma Area - Italy) in 1985, is a company specialized in the distribution of plastic films.

The Company puts its thirty years of experience in the distribution of plastic films at the service of its customers operating in the flexible packaging sector.

Our philosophy is to propose tailor-made solutions that allow us to offer a wide range of collaborations.

We are able to support our customers by offering:

Stock service

Fast delivery of quantities ranging from small batches to complete trucks. In this way the customer has the opportunity to cope with sudden and unplanned material requests.

The availability of the required sizes is also ensured by the presence in the production area of dedicated slitting and rewinding machines.

Call-off formula

The customer builds up his stock at our plants, thus reducing his financial and stock commitments, always having his goods available thanks to fast and punctual deliveries.

Consignment stock (*)

We provide a stock of goods, directly at the customer's warehouse, which has the advantage of eliminating the time required for transport and reducing financial assets.

(*) This type of service is limited to certain countries. Please contact us to check its applicability.

Direct containers

The customer has the opportunity to receive full shipment, 20ft or 40ft containers, produced according to his needs, in terms of type of material and size, without having to worry about customs and import procedures.

The main categories of products on which we focus are **ALUMINIUM FOIL, BOPET, BOPA and BOPP**, which are divided into a wide range of standard and special materials, in continuous evolution according to the technological needs of food packaging.

The great attention in the research and selection of companies producing plastic films, which has always characterized our work, is made available to our customers and partners, who can rely on us for the development of **new products** and for the realization of **innovative projects**.
