SOFT FILM EXTRA VELVETY

Product features:

Temptation Ultra is a Soft type film, which features an **extra matte finish** and an **exceptionally soft and velvety surface**. These characteristics make it ideal for elegant and sophisticated projects, perfect for those who want a material that stimulates both sight and touch, offering a complete sensory experience.

Temptation Ultra's **multisensory approach** is based on the idea that engaging multiple senses simultaneously enriches the experience and fosters a more intense and rewarding response from the recipient.

In addition, Temptation Ultra is distinguished by its **high resistance to scratches and fingerprints**, characteristics that make it particularly suitable for ensuring the beauty and durability of publicly displayed packaging, editorial products for browsing, and luxury brand packaging for point of sale.

Not only that, Temptation Ultra's surface also **enhances color rendering**, giving a unique depth to colors, particularly in dark and intense shades, where hues become even richer and more vibrant.

The product is available in **dry** and **wet** versions and for **digital**.

Application tips:

- Fashion, cosmetics, jewelry catalog covers.
- Packaging for cosmetics, leather goods, watchmaking
- Book covers (rigid or soft)
- Shoppers from boutiques and luxury goods stores

Usage Notes: use for post lamination processing, such as gluing, screen printing and hot stamping, is subject to prior approval testing.

Code	Product	Finishing	Thickness Micron	Lenght Meters	Internal Core mm
