"wet" & "dry"

protects and
enhances prints

MULTISENSORIAL SOFT FILM

Product Features:

The **Ultra Sense** velvety film is part of Mag Data's wide range of **soft films**. This film features a **matte finish and a very pleasant "soft" surface**, making it ideal for refined and elegant designs and for those seeking a material that appeals to both the eyes and the touch.

Mag Data Ultra Sense lends printed materials a **subtle elegance that captures attention** and naturally enhances the quality of the content, making every project unique and refined.

It is therefore particularly **well-suited for products intended for display**, such as packaging for retail items, wines and spirits intended as gifts, or finished products designed to immediately catch the eye.

The use of this product for subsequent processes such as lamination, screen printing, and UV printing is subject to **prior approval testing**. Application parameters may differ from those of conventional velvet film.

The product is available in **dry** and **wet** versions.

Main applications:

- Packaging for luxury products
- Display packaging in retail stores
- Covers for catalogs and high-end books
- Business cards
- Shopping bags for elegant stores and boutiques

Code	Products	Finishing	Thickness Micron	Length Meters
NDS028	ULTRA SENSE DRY	Soft Matt	28	3.000
